c. Other building sites on Ruegen Island are: one west of Arkona and one each side of Lohme. Evacuation of the civilian population has not begun so far as is known. There i regular naval traffic in Sassnitz harbor, including small naval craft and submarines. No details are available.

## 3. Poel

The firm of Kruegor of Vismar is engaged in concrete construction work on the island of Poel. A dump of building materials, including cement, iron, concrete mixers etc. is located at Kattenhof. Four concrete "bunkers", 15 x 15 meters in size, are situated in the dunes around Kattenhof, at 300 meter intervals. At the beginning of May the Krueger firm was carrying out trial borings in an area about one kilometer south of Timmendorf to test the ground and the water 50X1-HUM level. A Soviet building office is located in Kirchdorf.
